# Introducing Listrex Oravera Mouthwash

Listrex Oravera is an innovative oral care solution for orthodontic patients and those with dental prostheses.

Our formula combines Hydrogen Peroxide (3%) and Menthol (0.1%) to prevent plaque buildup and reduce gum inflammation.

# Key Ingredients

## Hydrogen Peroxide (3%)

Powerful antibacterial agent that oxidizes and eliminates harmful bacteria.

## Menthol (0.1%)

Provides cooling sensation and long-lasting fresh breath.

## Synergistic Effect

Combined ingredients work together for optimal oral health protection.

# Benefits for Orthodontic Patients

## Prevents Plaque Buildup

Effectively cleans around brackets and wires where brushing can't reach.

## Reduces Inflammation

Soothes irritated gums common during orthodontic treatment.

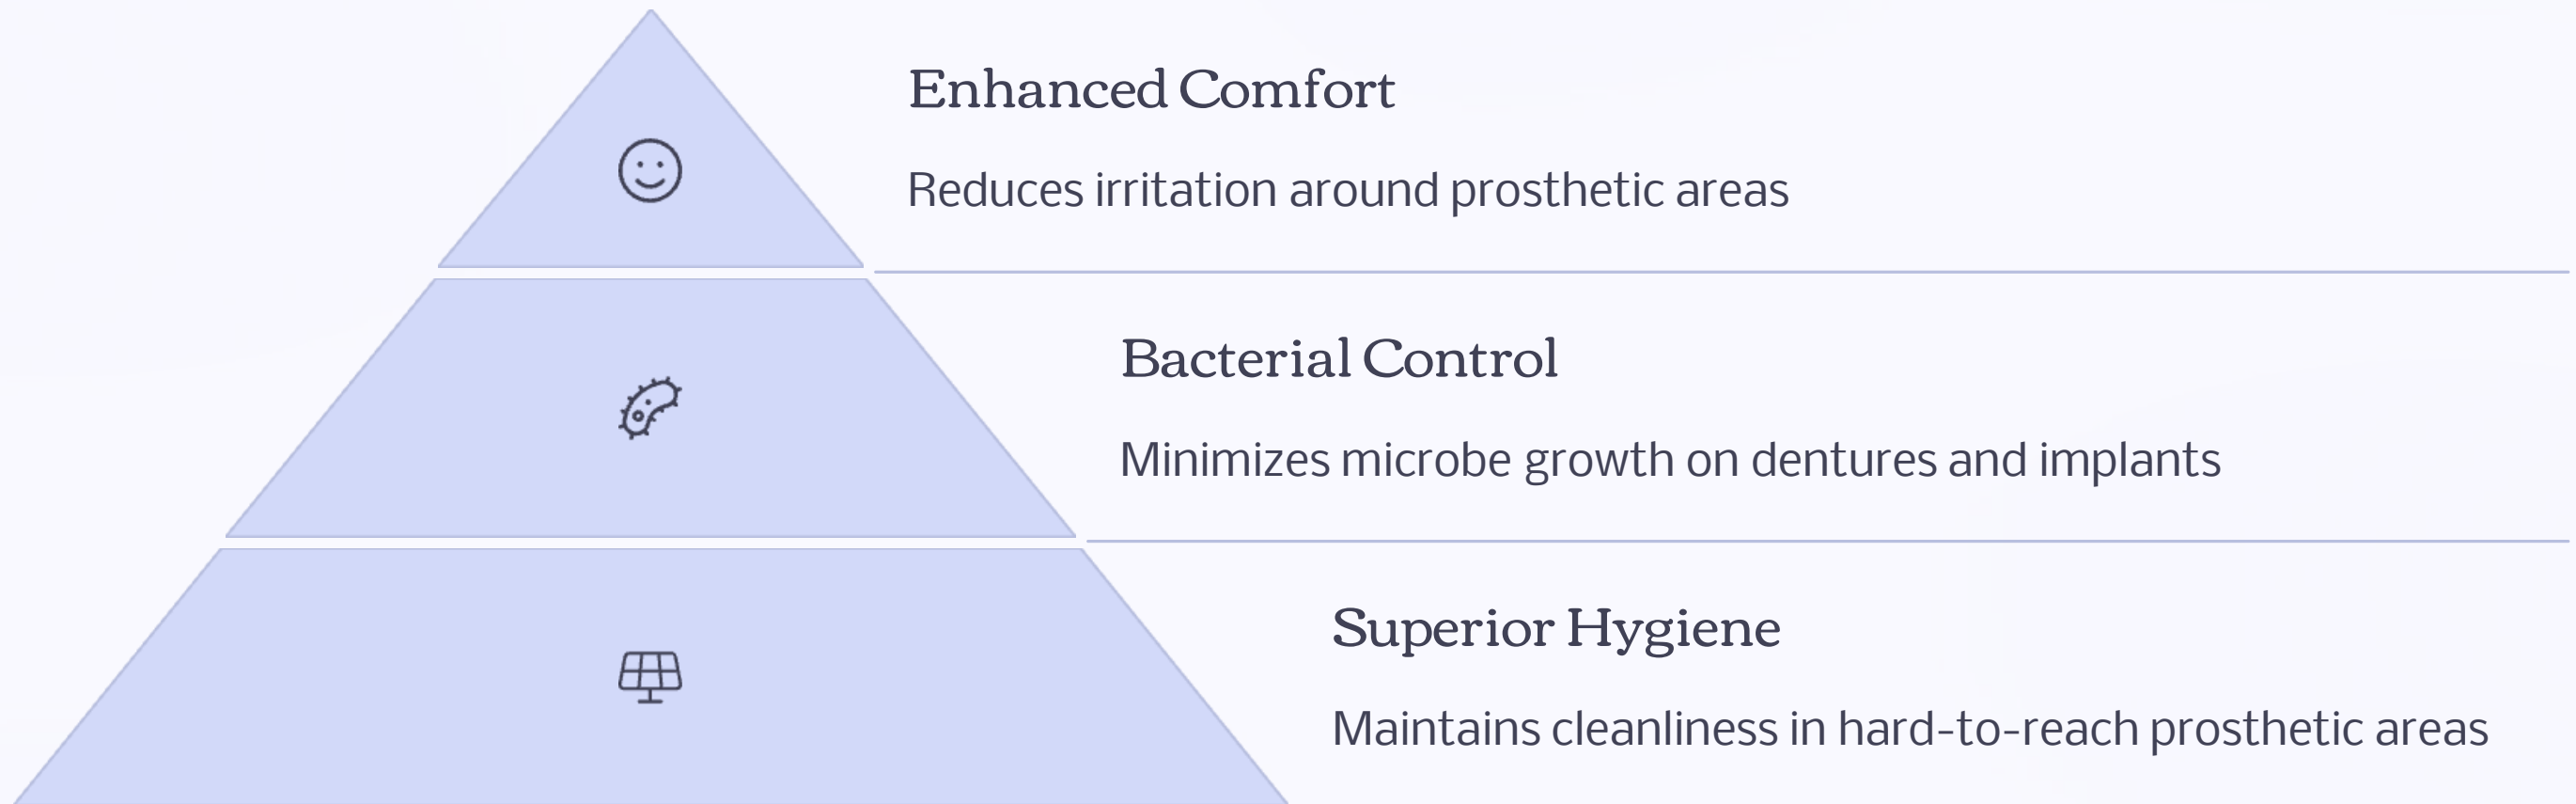

## Maintains Hygiene

Supplements brushing for complete oral care during treatment.

# Advantages for Dental Prosthesis Users

# How Listrex Oravera Works

## Oxidation

Hydrogen peroxide breaks down into water and oxygen.

## Protection

Formula prevents new bacteria formation.

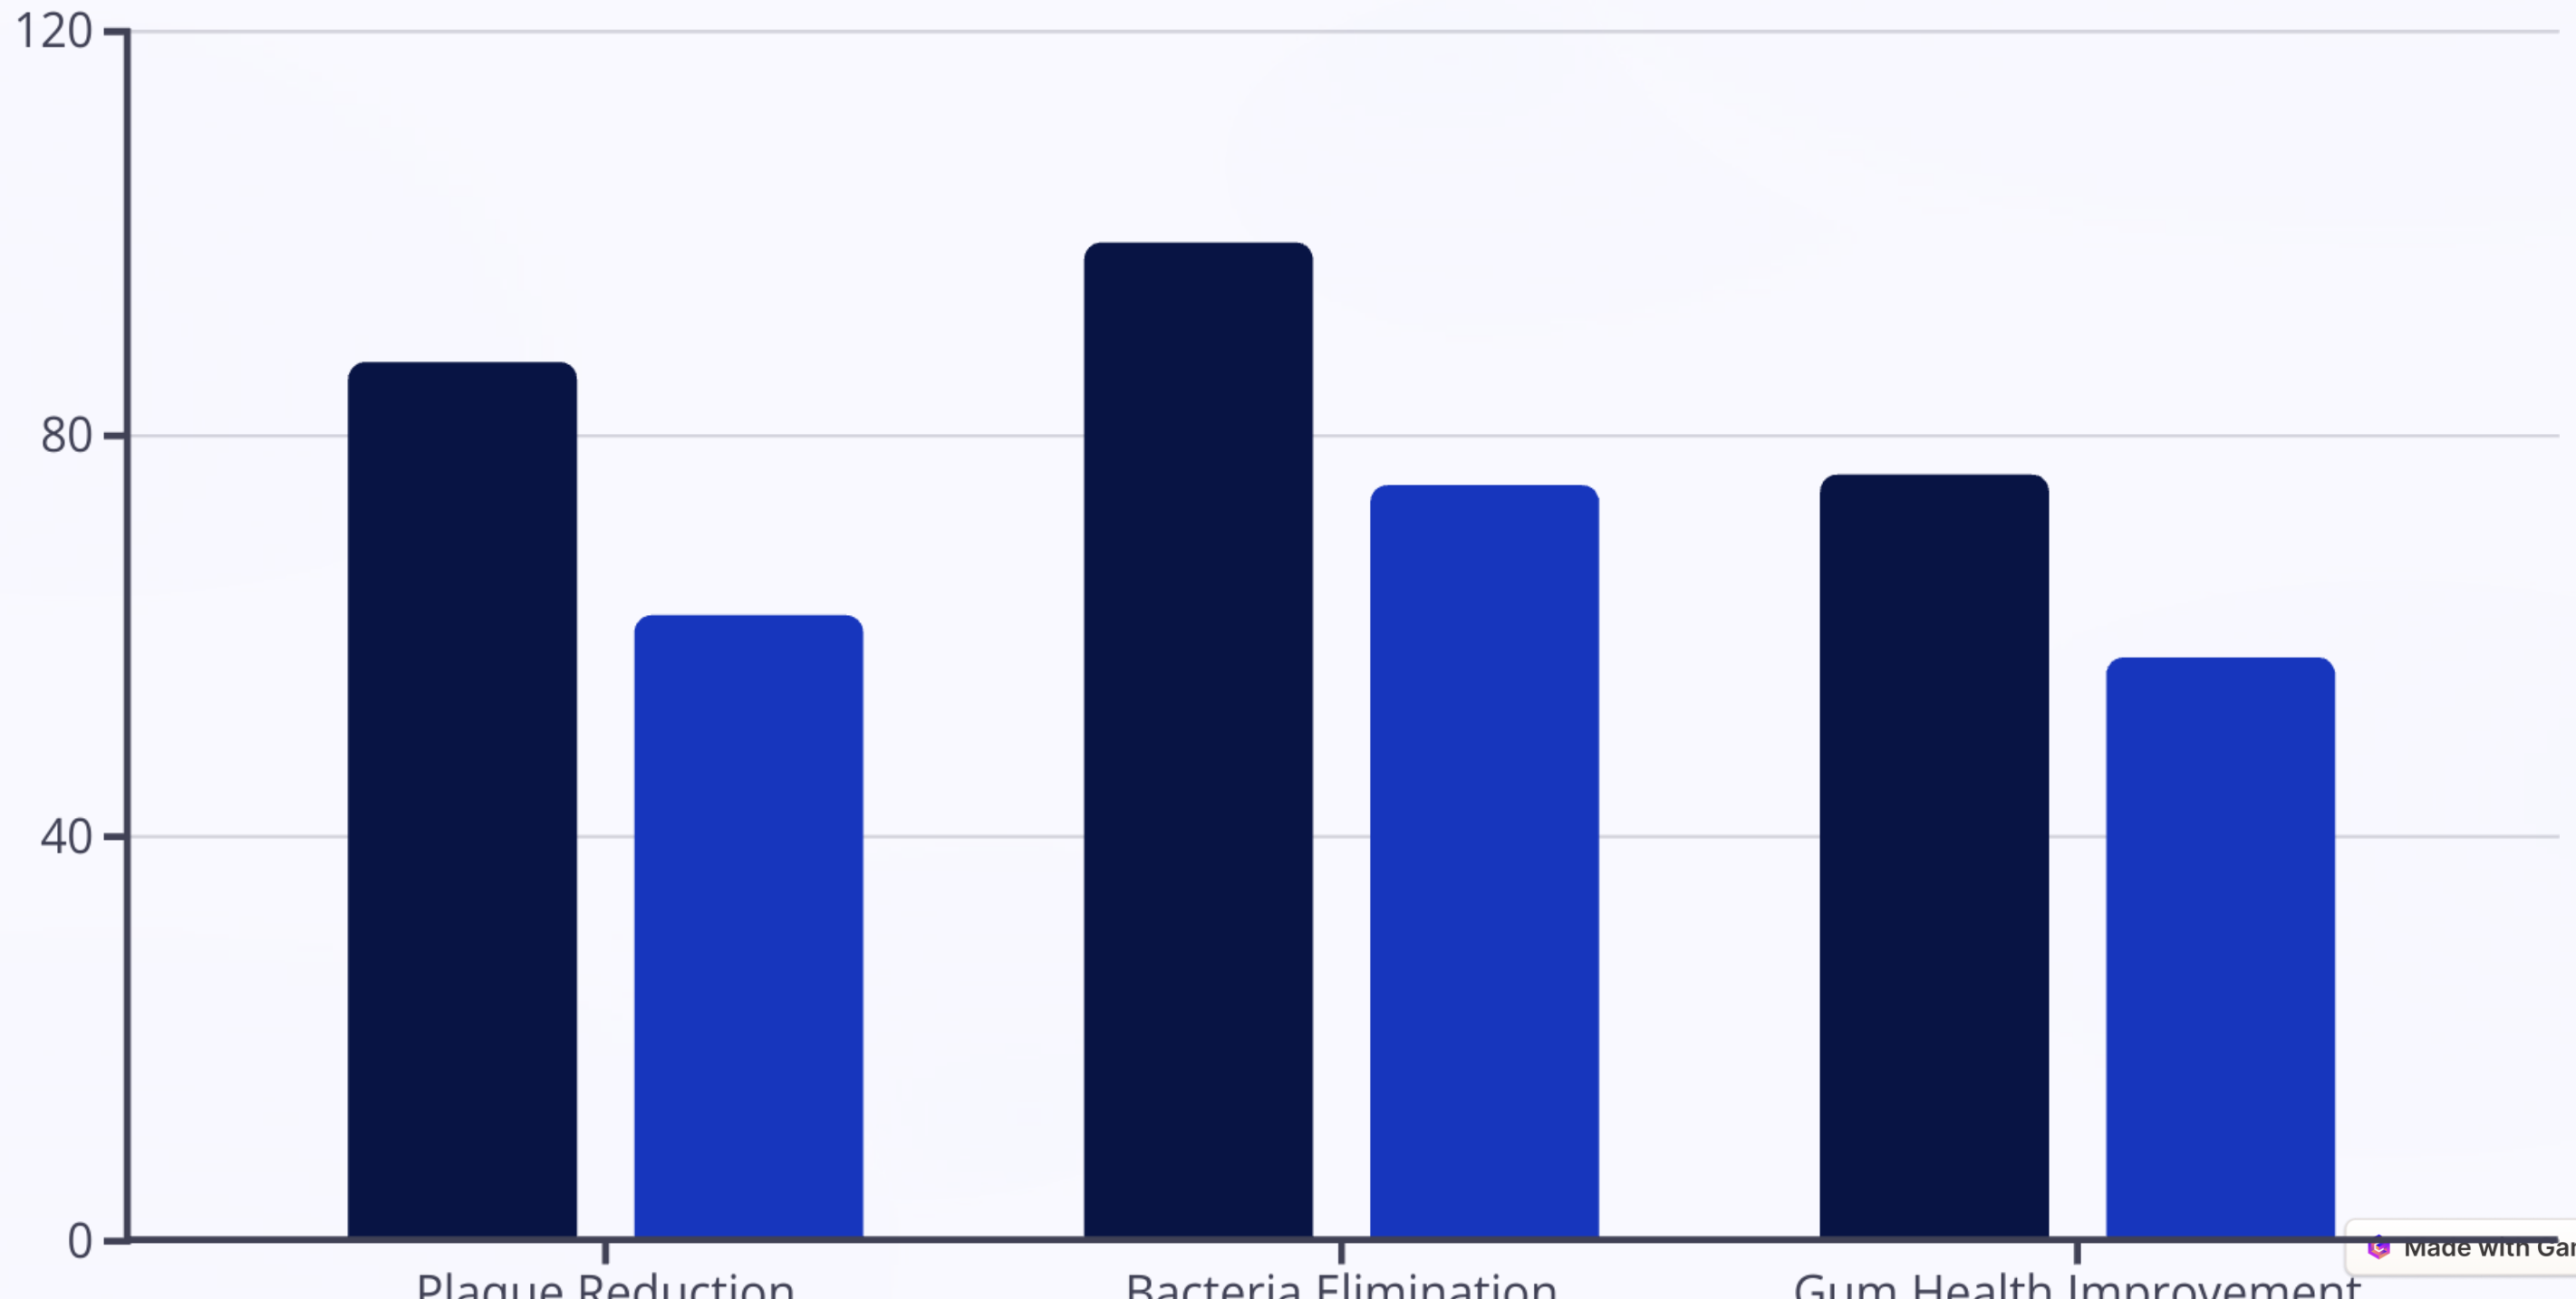

## Elimination

Released oxygen destroys bacteria cell walls.

## Refreshment

Menthol creates cooling sensation and fresh breath.

# Clinical Efficacy

# Why Choose Listrex Oravera?

## Specialized Formula

Uniquely designed for orthodontic and prosthetic needs.

## Gentle Yet Effective

Alcohol-free and non-irritating formula that delivers results.

## Fresh Breath

Long-lasting minty freshness while promoting oral health.

## Professional Recommendation

Trusted by dentists and orthodontists nationwide.
